Information Disclosure Statement

The information disclosure statement filed 25 October 2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because applicant did not provide a legible copy of all non-U.S. patents. The images on the CD-ROM are of such poor quality as to render them unreadable. Furthermore, the CD-ROM submission does not comply with 37 CFR 1.52(E) because the files are not in ASCII format and it does not contain proper subject matter for CD-ROM submission (see 37 CFR 1.52). It has been placed in the application file, but the non-U.S. documents referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chisti et al. (PCT Publication WO 98/58596 cited by applicant).

Chisti et al. disclose a computer implemented method, system, computer program on a tangible medium and computer system of separating a tooth from an adjacent structure. The

Art Unit: 3732

method comprises defining a cutting surface using cubic B-spline curves and applying the cutting surface between the tooth and the structure to separate the tooth from the structure in a single cut (see page 18, lines 12-21, page 19, lines 3-15). Regarding claim 16, see page 18, lines 22-29.

Response to Arguments

Applicant's arguments filed 25 October 2004 have been fully considered but they are not persuasive.

In response to applicant's arguments that Chisti et al. discloses the cut being performed as a sequence of erasures rather than as a single cut, it is noted that this sequence of erasures constitutes a single cut. In paragraph 57 of the instant application, applicant states:

Number of Erasers: A cut is comprised of multiple eraser boxes arranged next to each other as a piecewise linear approximation of the Saw Tool's curve path. The user chooses the number of erasers, which determines the sophistication of the curve created: the greater the number of segments, the more accurately the cutting will follow the curve. The number of erasers is shown graphically by the number of parallel lines connecting the two cubic B-spline curves. Once a saw cut has been completely specified the user applies the cut to the model. The cut is performed as a sequence of erasings with a single erasing iteration of the cut as described in the algorithm for an open ended B-spline curve. (emphasis added by Examiner).

Thus, it would appear that applicant's "single cut" is identical to that disclosed in Chisti et al. on page 19, lines 3-15. "Therefore, Chisti et al. clearly anticipates the claimed method.

Conclusion

This is a RCE of applicant's earlier Application. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case.

Art Unit: 3732

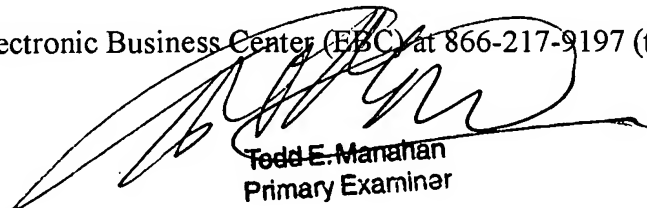

See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
